

Dear Admissions Committee at Harvard University,

I am writing to express my profound interest in pursuing graduate studies in ECON at Harvard University. Having long admired your institution's reputation as a leader in this field, I am confident that your academic environment is the ideal place for me to advance my knowledge and research capabilities.

My passion for ECON stems from a deep curiosity about its theoretical foundations and practical applications. Throughout my academic journey, I have consistently challenged myself to build a strong analytical foundation. I am now eager to transition from absorbing knowledge to actively contributing to the field through graduate-level research and inquiry.

My ultimate career aspiration is to become a data analyst, where I can apply advanced analytical methods to address complex challenges. In preparation, I have proactively developed a robust technical skill set, including proficiency in Power BI, SQL, and Python. I believe that true expertise emerges from applying these tools within a rigorous, research-oriented framework—precisely what the academic environment at Harvard University provides.

I am particularly drawn to Harvard University because of its distinctive strengths in areas that align closely with my academic interests. The groundbreaking research published in journals such as *American Economic Review*, *Annals of Statistics*, and *Econometrica* especially inspires me. The prospect of learning from and contributing to these scholarly conversations is a primary motivation for my application.

I am confident that my academic background, technical competencies, and dedicated enthusiasm for ECON make me a strong candidate for your graduate program. I am excited by the possibility of contributing to your vibrant academic community and am certain that Harvard University is where I will thrive intellectually and professionally.

Thank you for considering my application. I look forward to the possibility of further discussion.

Sincerely,

Wang Ziqing
