

Dear Admission Committee,

My name is Peiyao Jin, and I am honored to submit my application for the Master of Economics program at Department of Economics and Related Studies, University of York. I have always been fascinated by the dynamic nature of global markets and the way models can uncover patterns, explain behaviors, and guide decision-making. My academic and personal journey so far has been driven by a deep passion and a strong motivation to pursue advanced research in this field.

Beyond my coursework, I dedicate much of my personal time to exploring the frontiers of Economics research. I frequently read influential ABS 4* journals such as the American Economic Review, Econometrica, Journal of Political Economy. By critically engaging with these publications, I have gained valuable exposure to both theoretical innovations and empirical methodologies and strengthened my analytical skills.

My long-term aspiration is to become a Data Analyst who contributes to both academia and industry. To achieve this goal, I have actively cultivated a solid technical foundation. I am proficient in R, Tableau, PowerBI, which allow me to implement statistical models, process large-scale datasets, and develop predictive algorithms.

Thank you very much for considering my application. I look forward to furthering my journey as both a learner and a researcher in your distinguished program.

Sincerely,
Peiyao Jin
